Features

What's new in ReCap Pro 2021

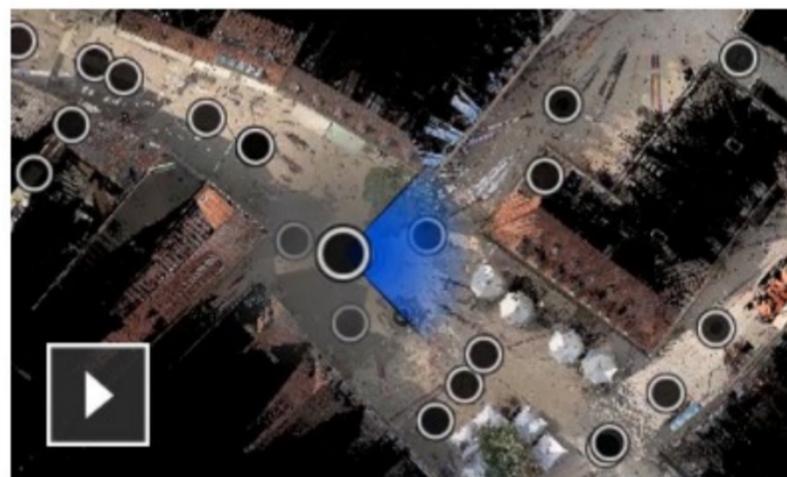

Discover how the newest features in ReCap™ Pro can help improve your BIM workflow. The images were captured with senseFly eBee X, S.O.D.A., and Aeria X.

FEEDBACK

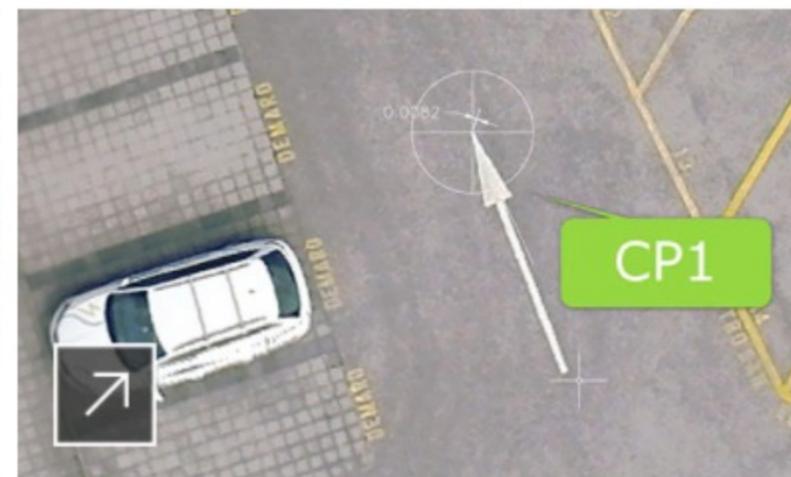

Project navigation

Compare the scan view (RealView) and overhead map view side-by-side. (video: 58 sec.)

Set coordinates & orientation

Use the compass widget to set the XY axis for the user coordinate system in the overhead view. (video: 1:15 min.)

3D photo reconstruction accuracy

Use high-precision GPS technology to avoid costly prep work in setting ground control points and get survey-grade accuracy from photo reconstruction.
